Re: Primary Water Right - Huntington Creek
Trail and Bear Canyons

Dear Wendell:

It has been brought to my attention by the Huntington-Cleveland Irrigation Company, that you have not maintained any shares of water in the Company to be used in exchange for mine and spring water at the mine and living quarters in Huntington Canyon. Because of the late priority of your water right, it is necessary for you to use shares in the Irrigation Company to cover the water you use during most of each year. According to information I have, 3.05 acre feet of water is approximately the amount you use in Bear Canyon. I question that this includes your uses in Trail Canyon. As a result, I would suggest that an Exchange Application be filed with this office for a sufficient number of shares to cover the quantity of water needed for approximately 75% of your total annual needs.

Your cooperation in seeing that this is completed in the near future would be appreciated. If you have any questions concerning this matter, please contact me.

Sincerely,

Mark P. Page
Area Engineer
